

Max Miller

Backend Developer — Django & Laravel

[your email] · [your phone] · Iran · github.com/cmd-3324 · miniwicket.ir

SUMMARY

Freelance backend developer specializing in Django and Laravel. Started coding in 2025 and have since shipped production-style projects covering e-commerce, real-time WebSocket features, and rate-limiting infrastructure. Focused on clean, targeted code and understanding a system before extending it.

SKILLS

Backend: Python (Django, Flask, FastAPI), PHP (Laravel)

Databases: PostgreSQL, MySQL, MongoDB

Infra: Docker, Git, GitHub Actions, GitLab CI, GCP

Data: NumPy, pandas, scikit-learn

EXPERIENCE

Freelance Backend Developer

Self-employed · 2025 — Present

- Built a Django e-commerce platform (mini-digi) with dark/light theming and EN/FR/RU internationalization
- Rebuilt the dashboard with AJAX-powered search, autocomplete, pagination, and sort/filter controls
- Designed a global rate-limiting middleware using django_ratelimit's core API
- Built a real-time discussion panel on Django Channels/WebSockets with Redis, Fernet-encrypted invite codes, and VPN/ASN-based abuse detection
- Built a session-based AI chatbot widget with CSRF handling and a message-cap system

PROJECTS

mini-digi — github.com/cmd-3324/mini-digi

Django e-commerce platform. Multi-language (EN/FR/RU), dark/light theme, AJAX dashboard, custom rate-limiting middleware, WebSocket discussion panel.
